JOHNNY WONDER

Q. "WHY DO WE BLINK OUR EYES?"

LEONARD HARTWELL, OF RAYNHAM, MA., WINS A PRIZE FOR THIS QUESTION.

A. We blink our eyes an average of once every six seconds. Our eyes are constantly being washed by the salty fluid we call tears. The tears come from tear glands located behind the upper eyelid at the outer corner of each eye. Each time we blink, the eyelids bring down tear drops, which wash away dust and other foreign matter and keep the eyes moist and healthy. After washing the eyeball, the tears collect in the corners of the eyes and drain away through tiny openings into the nose. Tears flowing through this opening make the nose run when a person cries.

You can win a World Almanac if your question is selected. Send your name and age to JOHNNY WONDER, c/o this newspaper, P.O. Box 1338, (D.A.) Santa Cruz, CA 95061.
